

CHAVIDISETTY NAGA SAI TEJASWI KUMAR

Hyderabad | +91 8897334187 | chavidisetteya@gmail.com | linkedin.com/in/tejachavidisetty | github.com/TejaChavidisetty

PROFESSIONAL SUMMARY

AI Engineer with hands-on experience building and deploying end-to-end Generative AI applications using Python, LangChain, LangGraph, FastAPI, and Large Language Models (LLMs). Developed production-ready AI systems including a RAG-based document assistant, an AI Fraud Copilot with multi-agent workflows. Strong analytical foundation from fraud operations and quality assurance at Wipro (Google Client) — experience that directly informs real-world AI problem-solving, root cause analysis, and data-driven decision making.

TECHNICAL SKILLS

Programming:	Python, SQL, Java
Generative AI:	LangChain, LangGraph, RAG, AI Agents, Prompt Engineering, OpenAI API, Groq API, Hugging Face, Transformers
ML / Deep Learning:	Scikit-learn, TensorFlow, PyTorch, NumPy, Pandas
Vector Databases:	ChromaDB, FAISS, Semantic Search, Embeddings
Backend & APIs:	FastAPI, REST APIs, Streamlit, SQLite, MySQL
Computer Vision:	OpenCV, MediaPipe
Cloud & DevOps:	Docker, Git, GitHub, VS Code, Jupyter Notebook

AI PROJECTS

AI Fraud Copilot | Python | FastAPI | LangChain | LangGraph | ChromaDB | Groq API | SQLite

- Built an AI-powered fraud investigation assistant using LangChain and LangGraph — implemented multi-agent workflows that automate case analysis and generate structured investigation reports.
- Implemented Retrieval-Augmented Generation (RAG) with ChromaDB vector database for semantic search over fraud case documents — improved contextual LLM response accuracy significantly.
- Integrated Groq API for high-speed LLM inference; developed REST APIs using FastAPI for frontend integration and deployed with production CORS

AutoML Insight Engine | Python | FastAPI | Scikit-learn | Pandas | NumPy | React | Groq API

- Built an end-to-end AutoML platform that automatically analyzes uploaded datasets, detects the appropriate ML problem type (classification, regression, or clustering), and executes the corresponding machine learning pipeline.
- Implemented automated data preprocessing, model training, model comparison, and best-model selection using Scikit-learn, with support for both supervised and unsupervised learning workflows.
- Developed a FastAPI backend and React frontend with REST API integration; deployed the application using Render and Netlify for public access.
- Integrated an LLM-powered insight layer using Groq API to convert model results and dataset characteristics into human-readable, actionable insights.

RAG Document Assistant | Python | LangChain | FAISS | Hugging Face | FastAPI

- Built an intelligent document Q&A system using RAG — implemented document loading, chunking, embedding generation with Hugging Face, and vector storage in FAISS for semantic retrieval.
- Developed FastAPI backend for document upload and querying; enabled accurate, contextual answer generation over multi-document knowledge bases using LLMs.

PROFESSIONAL EXPERIENCE

Wipro Ltd (Google Client) | Quality Analyst

Jan 2025 – Present

- Audited 300+ cases per week using analytical frameworks — performed root cause analysis, identified data patterns, and reduced team error rates by 90% through structured quality improvements.
- Built KPI dashboards and performance reports using Google Sheets — delivered data-driven insights to stakeholders that directly improved operational decision-making and SLA adherence to 98%.
- Mentored 10 analysts on investigation processes and analytical best practices — skills directly applicable to designing AI-assisted workflow systems.

i-ray IT Solution | Java Developer Intern

Jan 2024 – Jun 2024

- Built Java applications using OOP principles — implemented backend logic, REST-style data validation, and performance optimization, strengthening software engineering fundamentals.

EDUCATION

B.Tech — Electronics & Communication Engineering | Hyderabad | 2019 – 2023 | CGPA: 7.0
